

GROUPE GM

EXCLUSIVE AMENITIES

Ecofill,
the first innovative refillable
and 100% traceable dispenser

Ecofill

Ecofill is the first innovative refillable and 100% traceable dispenser available in 300 ml and 400 ml. Unlike traditional refilling systems, Ecofill reduces the risk of bacterial contamination thanks to its sealed refill pouches, made from just 8 grams of recyclable plastic, securing the product's origin, quality, and traceability.

A clean, safe, fast, and easy solution, with minimal environmental impact.

How *to use*

COMPOSITION

PART 1 - UPPER PART

PART 2 - BOTTOM

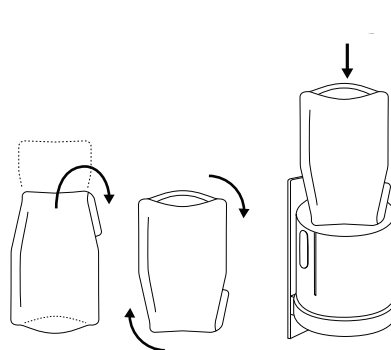

POUCH

PUMP &
DRILL TUBE

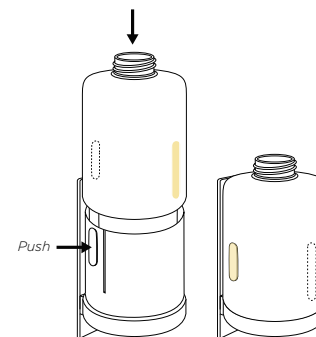

**FAST
& EASY**

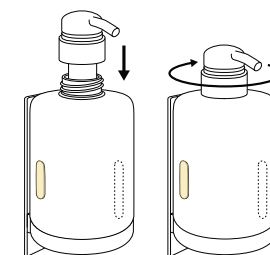

Step 1

Fold the pouch and place it into the bottom as shown on the picture.

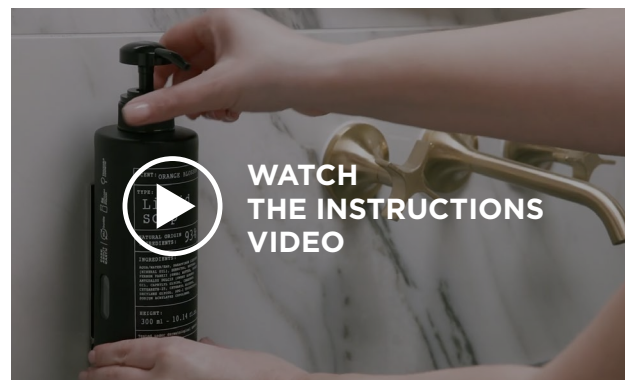

Step 2

Screw the two parts together.

Step 3

Drill the pouch with the pump, in locked position, and screw it on the Ecofill.

SMART FOR THE PLANET

- Economical and permanent system - only the pouch is replaced, the bottle remains.
- Reduce plastic waste (only 8 g of plastic per 300 ml pouch)
- Bottle made of Recycled Plastic, Aluminum, Polycarbonate, or Stonecast.
- 100% recyclable pouch
- 99% product restitution rate

UNDENIABLE QUALITIES

- Safe refillable system with no bacterial risk
- Full traceability in compliance with international and EU cosmetic regulations
- Product's origin and quality guaranteed
- Anti-theft bottle system
- Magnetic wall brackets for easy and secure installation

FAST AND EASY TO USE

- Takes only a few seconds to change the pouch
- Only the sealed pouch is replaced; the product stays clean
- Light and thin waste
- The bulk level can be easily monitored through the dual visibility window

A TAILORED DESIGN

- 100% customizable with your name and visual identity
